

**Biotech Entrepreneur to
Entrepreneur (BioE₂E) presents:**

Biotech Ventures Alternative Funding Fair: Grants

Join fellow entrepreneurs for a full-day session that will offer valuable information and insights directly from the agencies that give grants to life sciences companies. Get the inside track on what it really takes to get \$\$ from government agencies!

Numerous US and state government agencies provide start-up grant funding for biotechnology companies with innovative technologies. Grants provide non-dilutive funding, validation from peers, feedback from experts and prestige. At this one-day fair, you will learn about available programs including the SBIR and STTR programs, grant writing strategies and tactics, as well as meet government agency representatives. This event will enable you to determine if a grant is right for your project.
